EDUCATION

INDIAN INSTITUTE OF INFORMATION TECHNOLOGY

Allahabad, U.P.

B.TECH | I.T.

CGPA : 8.01

SPPS

Bhopal, M.P.

12TH | SSE

PERCENTAGE : 89.8

SKILLS

BACKEND

- Go • Java • Kotlin • Python
- Drop Wizard • Spring Boot
- UberFx • Guice • Velocity

INFRA

- PostgreSQL • AWS • Kafka
- ElasticSearch • Cadence
- MongoDB • Groovy
- Bash • Jenkins • Grafana

COURSEWORK

- Data Structures and Algorithms
- Design Patterns and OOPS
- Operating Systems
- Database Management Systems
- Computer Networks

ACHIEVEMENTS

- Had Sole ownership for PPI wallet for 3 months straight, handled 360 degree tasks for it. • Mentored **300+ students** for 2 years at Acciojob.  Also helped setup DSA and WebDev curriculum for initial batches
- Solved **1000+** coding questions over various platforms like **LeetCode**, **InterviewBit**, **CodeForces**.
- Achieved **99.53%** in JEE-Mains
- Achieved **345/450** in BITSAT,.

PROFILES

GitHub: [aryanDhakad](#)

LeetCode: [darkkoder1](#)

InterviewBit: [aryan-dhakad](#)

Codeforces: [Bhuta1809](#)

CodeChef: [a_wise_man](#)

EXPERIENCE

CRED | SOFTWARE ENGINEER

Jan 2025 - Present

Bangalore, Karnataka

- Refactored wallet microservices by enforcing **Java**, **Go-lang best practices**, **design patterns**, and championing **TDD** with comprehensive **Unit**, **SLT**, and **Integration Tests**. Worked on most of the **pending Tech debt issues** and optimizations, significantly improving code quality and service reliability.
- Spearheaded "**Big Rock**" initiatives: led the **Digilocker KYC journey revamp**, designed **Wallet Streaks** for user retention and incentivizing wallet usage, and integrated **UPI on PPI** and central **maintenance mode servers** and built **PPI Voice Bot support APIs**, to integrated PPI wallet into CRED ecosystem.
- Engineered end-to-end **PAC letter delivery automation** via **Delhivery API**—built a resilient pipeline handling shipment tracking, label generation, and delivery status for **10-20K daily user on-boardings**.
- Developed **Slack bots** for routine automations for QA, a custom **Wallet Utils Portal**, **Maker-Checker workflows** for config updates; extended **observability metrics** across all services, reducing manual intervention and improving debugging efficiency.
- Built and maintained a **PPI MCP Server** and enhanced the **PPI Agent** for automated debugging; authored comprehensive **Runbooks** for developers, on-call engineers, and AI agents.
- Worked on **critical compliance items** like : Built **Transactions control**, **Transactions history accessibility**, Account Validation flows and added Experiment mode to control accessibility when rolling out feature. Also worked on Passing **AML/FRM** data to downstream services to aid with fraud check in wallet use.
- **Sole owner** of the **Customer Support Portal (PPI)** used by Ops/Growth teams; served as **default on-call** for all wallet services, proactively unblocking stakeholders and driving releases with **extreme ownership**.

NAVI | SDE-1

July 2023 - January 2025

Bangalore, Karnataka

- Maintained and optimized the **Tele-Communication Portal**, enabling agents to **manage communications**, **synchronize loan data**, and improve EMI recovery efficiency by **20%**.
- Implemented **WhatsApp Portal** to enable **media and text** communication to customers WhatsApp via in-house portal.
- Took **end-to-end ownership** of developing a **data pipeline** for ingesting **CIBIL credit data**, leveraging **Apache Airflow**, **Scala**, **SQL** and **Kafka** to process and aggregate **credit scores**, **overdue amounts**, **phone numbers** enhancing data availability for **machine learning models** and **predictive analytics**, improving accuracy and operational efficiency by **22%**.
- Designed and implemented an **Error Handling and Analysis Framework**, providing **real-time visibility** into errors and improving issue resolution by **31%**.
- Refactored the existing code on the home page to **reduce latency by 96%**, leveraging **ElasticSearch** to optimize aggregations in **high-volume datasets**.

ARISTA NETWORKS | INTERN

Jan 2023 - June 2023

Bangalore, Karnataka

- Took **end-to-end ownership** of delivering the **Named BitsMap** feature on **EOS-trunk**, including **designing CLI commands**, creating **functional designs**, writing **unit and production tests**.
